THE SWIFT DIFFERENCE

As a leading manufacturer of holiday homes, touring caravans and motorhomes, we know just how to create the perfect retreat for your getaways. We apply this design and innovation excellence to all of our products, taking the time to understand what makes your breaks special and incorporating this in superb specifications, impeccable looks and creative space solutions.

Our years of experience have made the 2021 collection more diverse and impressive than ever, offering a huge choice of state of the art holiday homes for all tastes, requirements and budgets. With stylish new interior schemes and additional layouts, Swift raises the bar for leisure living.

Swift's renowned engineering and construction quality means every holiday home is built to last, and is set apart by key features like our strong, unique bonded 'sandwich' exterior walls, warrantied Fusion chassis and class-leading thermal performance. This is all wrapped up in one of the most stylish, thermally efficient and robust body structures on the market, and because we work with some of the industry's most trusted suppliers, you can be assured that everything is of the highest standard both inside and out.

CONSTRUCTION AND THERMAL EFFICIENCY

Swift's design team is widely recognised as one of the most innovative and creative in the industry, and we are constantly investigating new and better ways to develop our products. We have made significant construction and thermal efficiency improvements over the years, and continue to offer many unique build and engineering methods that set our holiday homes apart.

The NCC have introduced a Structural Thermal Rating Scheme for Caravan Holiday Homes built to BS EN 1647 which covers our Holiday Home range

and gives an indication of the likely thermal efficiency of the holiday home. The ratings are based on the calculated seasonal heating load per square metre of floor area, assuming the home is not used in the colder months between the beginning of December and end of February. A score between 1 and 10 is awarded with the most thermally efficient homes gaining a high numerical score. Homes with double glazing and good insulation gain the best ratings. When comparing scores, only homes of a similar size are comparable as the floor area affects the score.

DOUBLE GLAZING

In response to the demand for more energy conscious living, all ranges are available with heat reflecting 'Thermaglas' double glazing with a 16mm air space. This is fitted as standard on Vendee and Ardennes models and is optional on all other ranges.

CHASSIS

Every Swift holiday home comes with a 10-year anti-corrosion warranty. Swift is the only manufacturer specifying the Bankside Patterson I Beam, or Fusion galvanised chassis as standard on all its 2021 holiday home models. It has been created using the very latest design and technology to provide stability over the life of your home, not only protecting your investment but also offering peace of mind for years to come.

ROOF TRUSSES

For accuracy, strength and reliability, all Swift holiday homes use prefabricated roof trusses.

Hydraulic presses are used to press nail plates into the truss timbers to create the finished truss. The resulting roof strength is independently tested and meets Grade B snow loading (capable of carrying half a metre of settled snow), suitable for use in the UK and most of Europe, excluding Scandinavia and the Alps.

Once erected and secured in place, a minimum of 90mm glass wool insulation provides excellent thermal efficiency, followed by a breathable membrane and Thomas Panels plastisol tile effect roof sheets.

ENVIRONMENTAL CHAMBER TEST

Swift tests its holiday homes in an environmental chamber to optimise the heating and ventilation levels and measure thermal performance. Thermal imaging helps to ensure the products are fully designed and engineered to meet the requirements of a modern holiday home.

WALL CONSTRUCTION

All Swift holiday homes benefit from bonded 'sandwich' exterior wall construction for greater structural strength.

The walls are made in modules approximately 3m long and 2m high, which are securely fixed together during the holiday home's final assembly before being clad with aluminium. Each model consists of a robust timber frame, battened out and filled with an insulating layer of equal thickness. This is precision cut with water jets to eliminate air gaps or voids. On the outer surface is a breathable moisture membrane, and on the inner is a skin of plywood covered with a decorative wall covering.

These components are bonded together in the well-proven production unit, used to make similar panels for touring caravans and motorhomes. The panels act as structural members to help keep the whole home more rigid, as well as being straighter and resisting sideways deflection.

FLOOR CONSTRUCTION

In the standard Holiday Home ranges, the floor is constructed from timber joists much like a traditional home. Class-leading 50mm glass wool insulation is placed between the joists and the floor is covered with a breathable membrane. The floor surface is 18mm tongue and groove chipboard with a waterproof finish for durability.

SAFETY COMES FIRST

Your safety is paramount, and you can be assured that Swift takes this seriously. All our holiday homes are built in accordance with British and European standards EN1647 and EN1949 and are certified by the National Caravan Council (NCC).

Standard safety equipment includes a smoke alarm with a 10-year battery, carbon monoxide detectors in dining areas and hallways with a 5-year battery, and a fire extinguisher. Showers are fitted with thermostatic mixer valves to ensure a constant temperature.

SWIFT WARRANTY SCHEME

You can rest assured that your Swift holiday home comes with a comprehensive warranty, allowing you to simply relax and enjoy your home.

3-YEAR SUPERSURE WARRANTY

Your holiday home has 3-year cover for all parts and fittings (other than the structural exterior).

This includes items like:

- Freestanding furniture
- Kitchens
- Showers
- Sanitaryware
- Sockets and switches
- Interior doors and integrated furniture
- Gutter and fall pipes

5-YEAR STRUCTURAL WARRANTY

Your holiday home has a 5-year Structural Warranty and Swift will repair (or, at its option, replace) any defects with the structural integrity of the home that come to light and are notified to Swift during the warranty period.

The Structural Warranty covers any defect with the seams of the home, including water ingress through any permanently sealed seam joints and also items like:

- External doors
- uPVC windows
- Roof, walls and ceilings
- Carpets

10-YEAR CHASSIS WARRANTY

Your holiday home has a fully galvanised chassis with a 10-year Chassis Warranty, subject to maintenance. Swift will repair (or, at its option, replace) any defects with the chassis that come to light during this period, but only for as long as the home belongs to its first owner.

All warranties start from the date an approved Swift Group dealer or park operator transfers the unit to its first owner and are subject to conditions, terms and exclusions. For full details see www.swiftgroup.co.uk/owners/handbooks

EXTERIOR FINISHES & SOFT FURNISHINGS

Swift holiday homes are designed for long-lasting great looks, both inside and out. The exterior is woodgrain textured aluminium cladding.

SWIFTSHIELD

Selected Swift holiday homes are available with the exclusive option of SwiftShield fabric. SwiftShield fabric has a soft suede-type feel and has been cleverly treated during manufacturing to resist stains. It is very easy to clean and requires only a soft cloth dampened with water to remove most stains.
